Rev: July 1, 2018

## California Proposition 65 Statement of Compliance

To Whom it May Concern:

This certification is to inform American Fittings Corporation's concerned parties that items produced by American Fittings do not contain chemicals which are listed on California's Safe Drinking Water & Toxic Enforcement Act of 1986 except as noted below. This Act, commonly known as Proposition 65 (Prop 65), establishes a list of chemicals which the state of California's risk assessment process has determined to present a risk of cancer, birth defects or other reproductive harm. The Proposition 65 chemical list can be found at:

<https://oehha.ca.gov/proposition-65/proposition-65-list>

The regulation entitles a manufacturer to demonstrate through testing that no chemicals from the list are present or, if they are present, that they cannot be ingested, inhaled, or absorbed through the skin. The steel that we use in our products contains one listed chemical/metal, lead, that is incorporated into the molecular structure of the alloy. We are not individually applying warning labels to our product(s) because they do not provide any of the avenues for exposure (ingestion, inhalation, or absorption) under normal, intended usage.

American Fittings is committed to providing safe, high quality products for our concerned parties. We have worked with our vendors and our supply chain partners to ensure the purchase of raw materials will meet Prop 65 standards. Be assured, American Fittings Corporation will compare any newly listed chemicals with the raw materials in our finished product and communicate this information to our concerned parties.

Allen Fischbein  
AMERICAN FITTINGS Corporation
